

# The Unyielding Challenge of Metal Corrosion

Protecting structural integrity and project value against the elements.

# The Traditional Workflow: A Battle of Time, Labor, and Complexity

## Extensive Surface Preparation

Mechanical grinding and sandblasting to remove all existing rust.

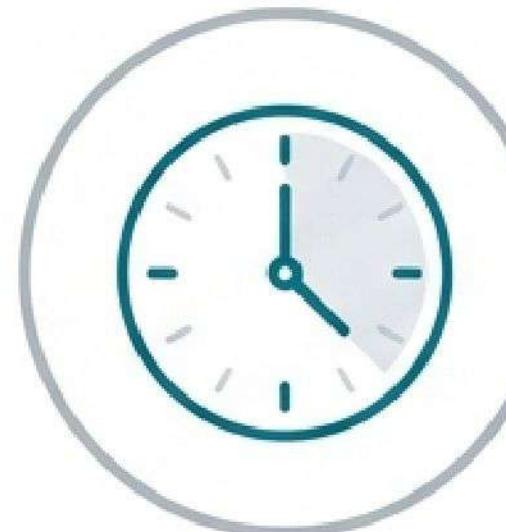

## Multiple Chemical Treatments

Application of separate rust converters or inhibitors.

## Initial Priming Coat

Application of a dedicated anti-corrosion primer.

## Awaiting Curing Times

Significant delays between each stage for drying and curing.

This multi-stage process increases project timelines, inflates labor costs, and introduces multiple points of potential failure.

# A Smarter Approach to Metal Protection

Introducing SUBER-OXID, the water-based anti-corrosion primer that streamlines metal treatment. It provides outstanding durability and protection in a single, efficient product.

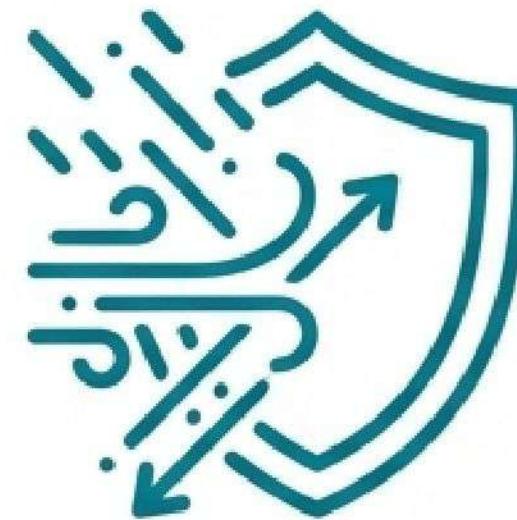

# Three Functions. One Revolutionary Product.

## Direct to Rust

Formulated with advanced rust neutralizers, allowing direct application on rusted metal surfaces, drastically reducing preparation time.

## Anti-Corrosion

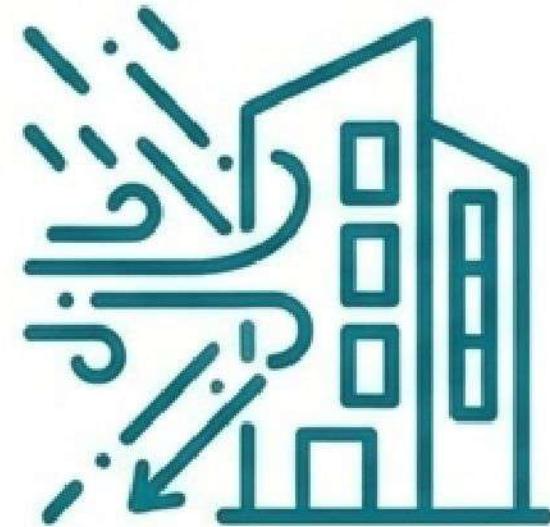

Contains powerful anticorrosive agents that prevent flash rust during application and provide long-term protection against oxidation.

## Easy Application & Low Odor

A water-based formula that simplifies the painting process and minimizes unpleasant smells for a better working environment.

# Engineered for Superior Performance and Durability

## Excellent Atmospheric Resistance

Built to withstand exterior exposure and harsh atmospheric agents over the long term.

## High Adhesion

Creates a strong, reliable bond with the substrate, preventing peeling and delamination.

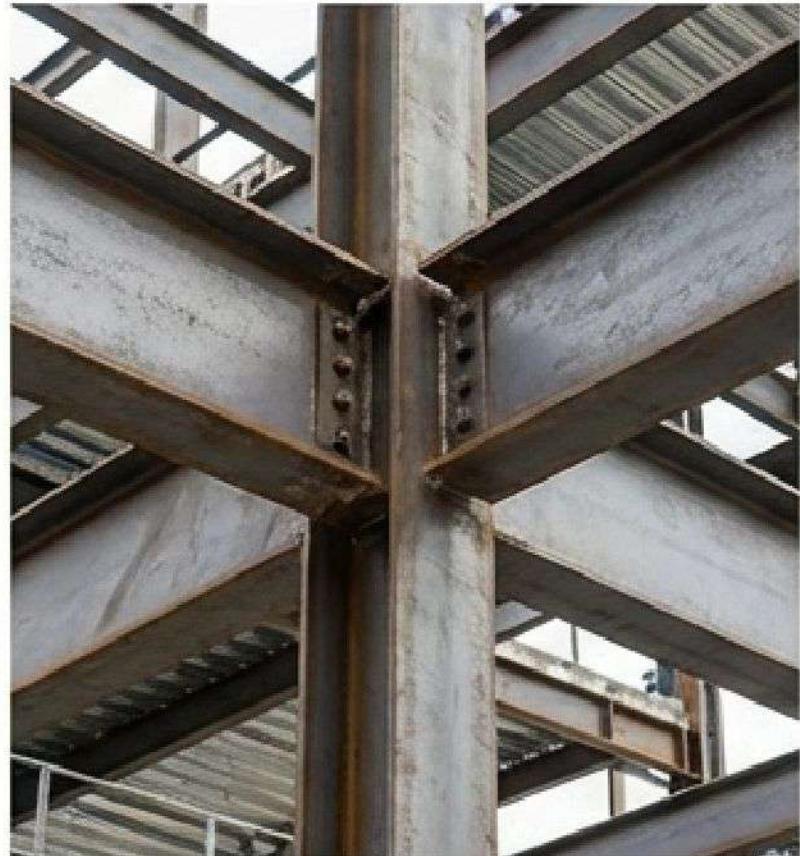

## Elastic Finish

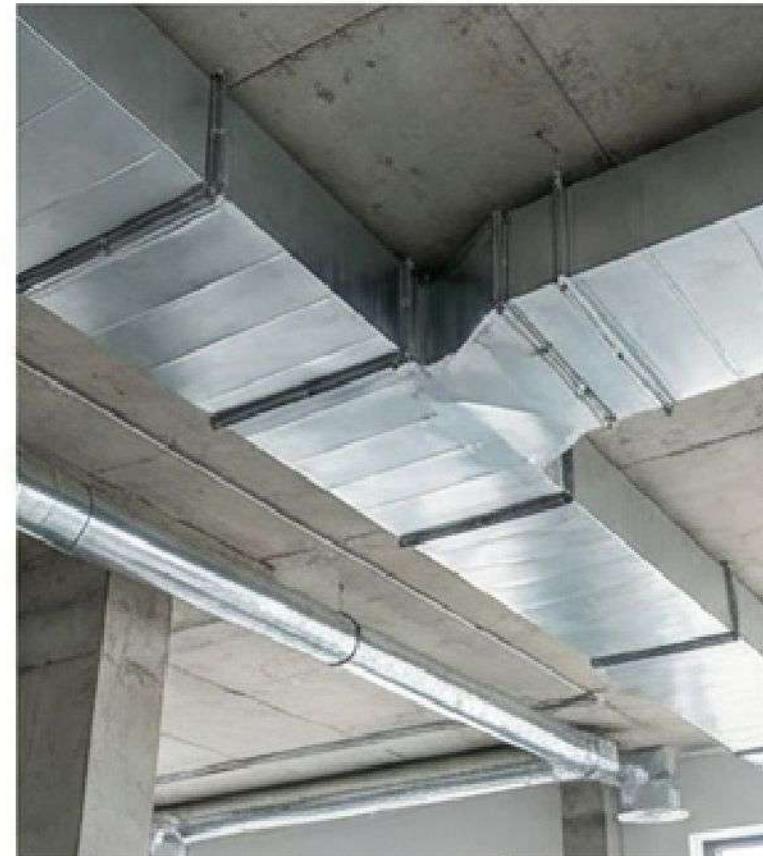

Provides a flexible coating that adapts to the metal's natural expansion and contraction, resisting cracks.

# Versatile Protection for All Metal Surfaces

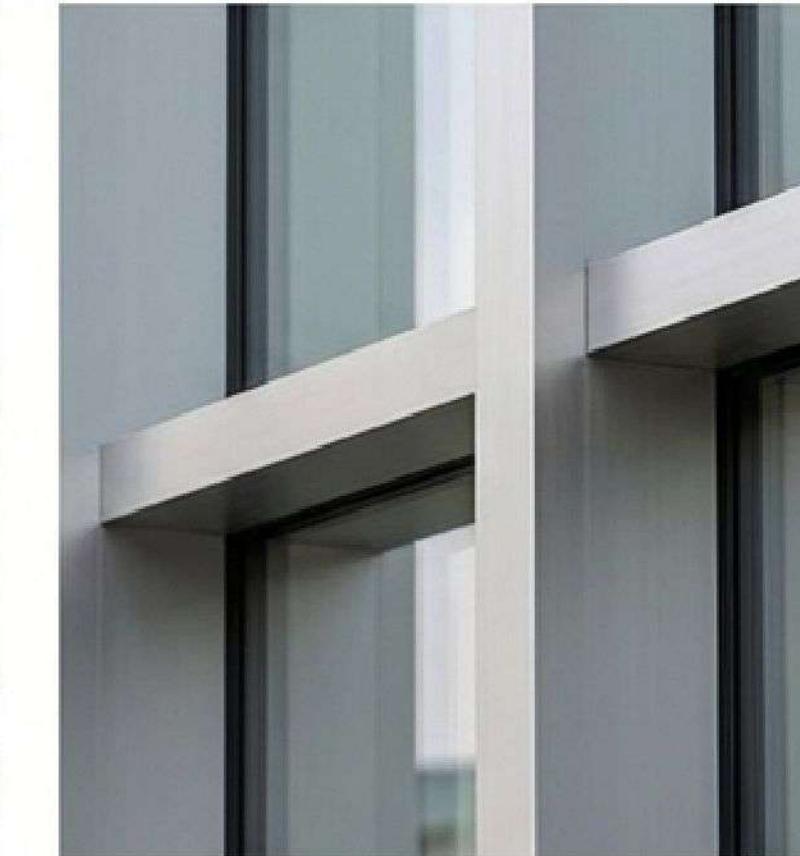

SUBER-OXID is recommended for protecting virtually any type of metal surface in new construction or renovation projects.

Iron/Steel

Galvanized

Light Metals

Renovation Projects

Supported Surfaces: Iron, Steel, Galvanized, Light Metals, and more.

# Surface Preparation Guide: New & Light Metals

## New Metallic Surfaces

- 1 Degrease:** Thoroughly degrease the entire surface to remove oils and residues.
- 2 Clean:** Ensure the surface is completely free from dirt, dust, and other contaminants.
- 3 Check Stability:** On surfaces with old paint, remove any poorly adhered sections.
- 4 Ensure Dryness:** The surface must be completely dry before priming.

## Galvanized & Light Metals

- 1 Degrease:** Perform a thorough degreasing of the entire surface.
- 2 Test Adhesion:** Conduct an adhesion test to ensure compatibility and proper bonding.
- 3 Apply Coats:** Apply a minimum of two coats of SUBER-OXID primer for optimal protection.

# Surface Preparation Guide: Previously Painted & Rusted Surfaces

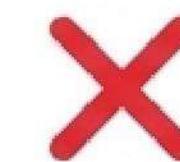

*SUBER-OXID can be applied directly to rust, provided the substrate is in good condition.*

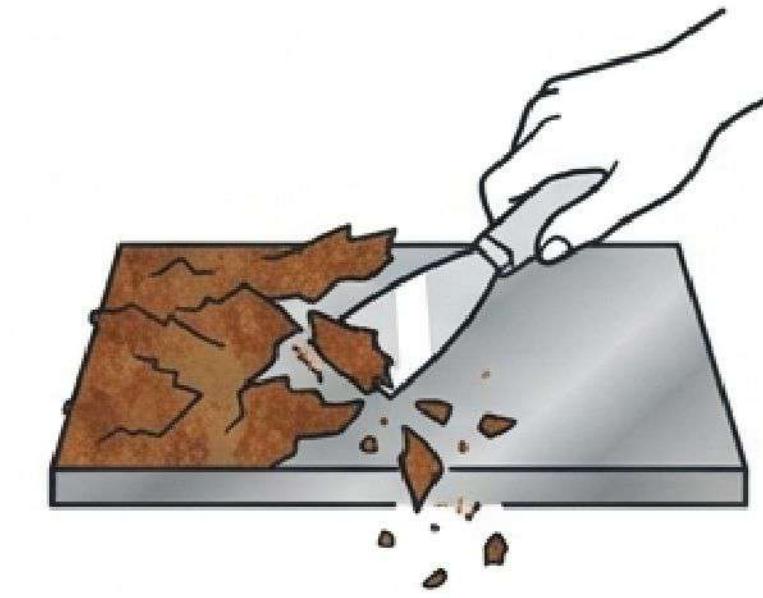

**DO**

Apply directly over sound,  
well-adhered rust.

**DON'T**

Remove any flaky or loose rust  
mechanically before priming.

1. **Degrease:** Clean the surface of grease and grime.
2. **Remove Loose Paint:** Scrape or brush away all poorly adhered old paint.

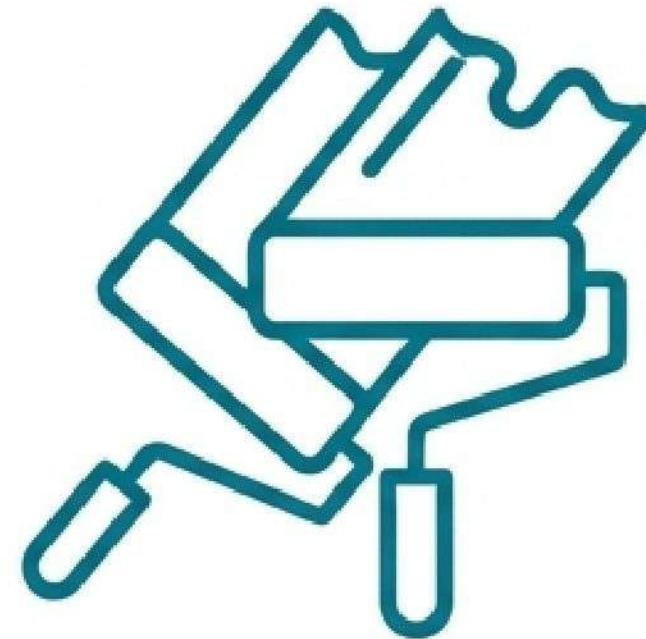

3. **Verify Adhesion:** If old paint is in good condition, confirm its solidity and adhesion.
4. **Ensure Clean & Dry:** The surface must be free of dirt, mold, moisture, and loose rust.

# The Application Process: Achieving a Flawless Finish

## Mixing

Mix the product thoroughly to ensure a uniform consistency before application.

## Application

Apply the primer to a completely dry surface. It is recommended to apply at least two even coats, avoiding drips or runs.

## Tools

Versatile application is possible using a brush, roller, spray gun, or airless equipment.

# Technical Specifications at a Glance

## Appearance

**Finish:** Satin

**Color:** White (UNE EN ISO 11664-4)

## Performance

**Drying Time:** 2 - 3 hours\*

**Recoat Interval:** 4 - 6 hours\*\*

**Coverage:** Approximately 0.5 L/m<sup>2</sup>

## Physical Properties

**Density:** 1.05 ± 0.05 kg/L

**Viscosity:** 30,000 ± 5,000 cps (Brookfield)

## Environmental

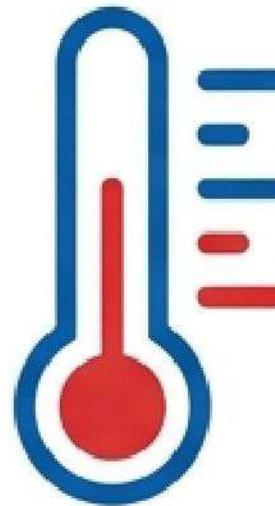

**VOC Content:** Max 20 g/L

**EU Limit Value:** Cat. A/i 140 g/L

\* / \*\* Under normal conditions (20°C and 60% relative humidity).

# Project Planning & Logistics

## Optimal Application Conditions

**Temperature Range:**  
Apply when ambient temperatures are between 5°C and 35°C.

**Weather:** Do not apply if there is an imminent risk of rain.

## Packaging & Availability

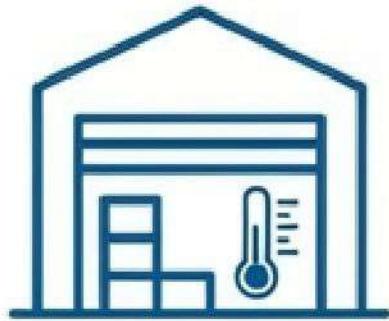

Available Sizes:

- 2.5 L Pots
- 15 L Pots

# Storage and Shelf Life

## Storage Conditions

Store in a cool place, at a temperature between 5°C - 45°C.

## Protection

Keep away from direct exposure to sunlight and frost.

## Sealed Shelf Life

Up to 2 years from the date of manufacture in the original, sealed container.

## Opened Shelf Life

Once opened, use within 15 days.

# Health and Safety Guidelines

Standard safety precautions must be followed during application.

-  Keep out of reach of children.
-  Do not eat, drink, or smoke during application.
-  Avoid contact with skin and eyes. Rinse with clean water if contact occurs.
-  Do not dispose of the product down drains.

# Specify Efficiency. Deliver Durability.

SUBER-OXID streamlines metal protection by combining a rust neutralizer, anti-corrosion primer, and easy-application formula into one product. Reduce preparation time, lower labor costs, and ensure long-lasting results.

**For guaranteed performance, SUBERLEV products must be applied by applicators approved by the manufacturer.**

**The definitive choice for protecting metal assets.**
